**DETAILED ACTION**

1. The amendment of 03 April 2006 has been noted and made of record.
2. Claims 9-17 have been presented for examination.

***Response to Arguments***

3. Applicant's arguments with respect to claims 9-17 have been considered but are moot in view of the new ground(s) of rejection.
4. See further rejections that follow.

***Claim Rejections - 35 USC § 103***

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
6. Claims 9-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,883,958 to Ishiguro et al., hereinafter Ishiguro, in view of U.S. Patent No. 6,751,598 to Yagawa et al., hereinafter Yagawa.
7. As per claims 9, 10, 11, 14, and 15, Ishiguro discloses an information system, comprising:
  - storing content data (column 3, lines 54-65);
  - comparing a previously calculated value with the hash value of the content data calculated (column 4, line 43 to column 5, line 15); and
  - controlling reproduction of the content data based on the result of the comparison performed (column 4, line 43 to column 5, line 15).
8. Ishiguro does not disclose means for setting a sequential number corresponding to the content data, the sequential number incremented by one when an operation is performed on the

Art Unit: 2131

content data stored in the means for storing content data; means for calculating a hash value corresponding to the content data by performing a predetermined calculation using at least a part of the management data associated with the content data and the sequential number.

9. Yagawa teaches means for setting a sequential number corresponding to the content data, the sequential number incremented by one when an operation is performed on the content data stored in the means for storing content data (Figure 8 [block 640]; column 10, line 55 to column 11, line 36; column 12, lines 18-58);

means for calculating a hash value corresponding to the content data by performing a predetermined calculation using at least a part of the management data associated with the content data and the sequential number (column 8, line 52-57).

10. It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply a hash function to the data, since Yagawa states at column 8, lines 52-57 that such a modification would serve as a way to authenticate to continue providing the content to the user.

11. Regarding claims 12 and 16, Yagawa teaches performing said calculation by applying a hash function to the calculation information included in the content (column 8, line 52-57).

12. Regarding claims 13 and 17, Yagawa teaches the management information includes identification information identifying the data (Figure 1 [blocks 21, 23, 31, 32], column 7, lines 18-47, column 9, lines 7-21).

13. Yagawa and Ishiguro do not teach wherein the data is music data.

Art Unit: 2131

14. It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the combination of Yagawa and Ishiguro to musical data, since Yagawa states at columns and 4 that the present invention is directed to blocking the piracy of digital data and preventing the use of illegally obtained copies.

***Conclusion***

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

16. The following patents are cited to further show the state of the art with respect to digital rights management, such as:

United States Patent No. 6,101,606 to Diersch et al., which is cited to show securing protected software from unauthorized use in computer networks.

17. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

18. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
